

Konftel 300 and 200 conference phones for all your meetings

An easy-to-use conference phone that delivers superior audio quality is essential for productive remote meetings. The models in Konftel's 300 series are very similar to look at and many of their key features are the same. OmniSound® delivers HD-quality audio and incorporates a conference guide, phonebook, conference group storage and other useful features to get your meetings up and running. Many of the models can also connect calls from different connections or lines.

Another smart feature is SD card recorder capability for meetings and dictations. Play back, save or share your recordings. The Konftel 250 incorporates our OmniSound® audio technology even though it has fewer other features in general.

To find the model that best suits your needs, think about how you want to meet. Fixed-line or wireless, small or large situations, smart features or minimalistic? Whatever you decide on, you'll be amazed by the outstanding audio quality.

SHARED FEATURES IN THE KONFTEL 300 SERIES:

- Multiple connectivity options: analogue, SIP, computer and wireless DECT and mobile
- OmniSound® – superior audio quality with support for HD audio
- The conference guide helps you make multi-party calls and store conference groups
- The phonebook stores contacts
- Menu and quick reference guide in multiple languages
- Record meetings on a memory card
- Two-year warranty

NEW

Konftel 300IPx The Art of Easiness

One click is all it takes to start or join a meeting. Conference calls are easier than ever with the Konftel 300IPx and Konftel Unite mobile app.

KONFTEL UNITE
One touch conferencing

Konftel 300IP Innovative teleconferences

The Konftel 300IP is SIP-based, has an integrated conference bridge for five-way calls, intuitive web-based configuration and is compatible with Power over Ethernet. Expansion options make it ideal for really large occasions too.

Konftel 300 For all your meetings

Multiple connectivity and expansion options make the Konftel 300 a versatile phone even on really large occasions.

Konftel 300Mx Unrestricted meetings

Insert the SIM card for effortless, wireless meetings. Mobile calls can easily be connected to IP calls. The battery provides up to 30 hours of talk time. For meetings on large and small occasions.

Konftel 300Wx Wireless meetings

The battery allows 60 hours of talk time which makes the Konftel 300Wx totally wireless in DECT environments. Also allows connection to mobile phones and computers with the option of connecting the calls. For small and large meetings.

Konftel 250 Simple yet sophisticated

The Konftel 250 with analogue connection is perfect for simple meetings in large and small conference rooms.

OmniSound® Superior audio quality

The patented OmniSound® audio technology guarantees an impressive and crystal-clear full-duplex audio in both directions. The sound is transmitted clearly and powerfully to all attendees thanks to a hypersensitive microphone with 360° audio pick-up and speakers.

OmniSound® delivers HD audio in calls over IP and provider networks. It also incorporates automatic echo cancellation and noise suppression, which minimises background noise interference, and an equaliser for personal adaptation of the audio properties.

This means you can walk around in the room, talking, discussing and debating with others without loss of audio quality and without any annoying sound clipping, damping or echoes. It's as close to real sound as you can get.
